Customer Satisfaction is Our #1 Priority

INODE does a great job and the team is appreciative of what they do and their honesty on best solutions for the environment. Trust is never an issue. - Federal Customer

INODE ENGINEERS

Consistently aim for perfection and are always on the lookout for ways to improve our customers day-to-day lives, for both stakeholders and end-users.

Company Overview

CAGE: 5GZN7

UEI: JEAKKN4EM9X8

CONTRACT VEHICLES:

CIO-SP3 SB, GSA MAS, GSA 8(A) STARS III

NAICS:

333415, 334220, 335311, 423430, 511210,
541330, 541511, 541512, 541519, 541690,
541990

Examples of Customer Success

FIXED NODE EQUIPMENT AND INTEGRATION

US Army Intelligence & Security Command (INSCOM)

INODE provided design, engineering, configuration, and administration services for the classified and unclassified Fixed Node infrastructure at the Ground Intelligence Support Activity (GISA). Our team performed requirements analysis and solution development and continues to provide fielding support, capability testing and integration, Tier III administration, maintenance, and operations, and quality assurance testing.

- On-site SME level engineering, design, and architecture support for NetApp, VMware, Cisco, and F5
- Installation, Migration, and Integration services
- CISSP services including Risk Management Framework (RMF) development, Authority to Operate (ATO) support, and Security Technical Implementation Guides (STIGs) for rapid network turnup
- Provided physical site with required power, cooling, and security requirements for configuration activities, enabling network development in parallel

SECURITY COOPERATION ENTERPRISE SOLUTION

Defense Security Cooperation Agency (DSCA)

INODE provided Data Management and Reporting System (DMRS) deployment, applications lifecycle management, and information architecture (IA) services using emerging technologies and robotic process automation to meet on-demand needs of the global Foreign Military Systems (FMS) community.

- Data and metrics analysis through Extract-Transform-Load (ETL) processes
- Dashboard design and implementation
- Defect resolution cycle time reduced by 31%
- Resolved 69% of break-fix defects in production
- Time-to-execute data pulls reduced by 49%
- Created a Robotic Process Automation (RPA) path to conduct daily operational checks, which reduced testing from several hours to less than 2 minutes
- Data processing time and complexity reduced
- 80% of planned costs expended

WEAPONS SYSTEM (WS) FLEXPOD DEVELOPMENT

USAF Air Operations Center (AOC)

INODE modernized and consolidated the complex physical infrastructure behind the AOC WS by designed and fielding a FlexPod solution at all AOC locations, both CONUS and OCONUS. We moved the AOC from a physical to a virtual environment which reduced expenses, improved performance, and better served system needs. We also assisted with the design of the AOC Trusted Thin Client (TTC) initiative.

- Created Disaster Recovery (DR) capability between three sites, two OCONUS
- Reduced footprint by 70%, reducing capital expenditure and improving performance
- Planned migration path for private cloud environment

CYBER SUPPORT SERVICES 2

United States Air Force (USAF)

INODE provides end-to-end Infrastructure as a Service (IaaS) capabilities including storage, virtualization, and data protection for several USAF systems. Our team has integrated various vendor technologies through architecting, designing, and fielding at both CONUS & OCONUS sites.

- Delivered highly functional, scalable, hardware-agnostic, enterprise-wide IaaS solution
- All testing and integration for hardware buys and upgrades accomplished at zero additional cost to customer
- Storage upgrades completed two months ahead of schedule
- Migrated systems to newly integrated infrastructure with zero downtime
